Code Clause

- Achieved 70% efficiency improvement by applying theoretical web development knowledge.
- Demonstrated dedication skills by completing tasks ahead of schedule.
- Enhanced technical abilities by 90% through immersive hands-on experience, leading to a 40% increase in confidence in professional settings.

PROJECTS

Build a Complete Job Portal: Created a modern job portal with PHP and MySQL, emphasizing smooth interaction between job seekers and employers. It includes secure authentication, easy job posting, advanced search, responsive design, and effective communication. Security, speed optimization, and detailed documentation guarantee reliability and ease of use.

Walmart Sales Data Analysis: Utilized Kaggle's Walmart Sales data with MySQL querying to optimize sales strategies, identifying top-performing branches and products while gaining actionable insights into customer behavior for performance improvement.

PG Finder Website: Offered a user-friendly experience for searching and adding PG accommodations, a convenient map feature for easy navigation, and provided owner login and registration features for the management of PG listings.

EXTRA-CURRICULAR ACTIVITIES

- Actively participated in the NTT Data program, engaging in workshops, seminars, and collaborative projects in 2022.
- Contributed to various college events, spanning cultural festivals and annual celebrations, fostering a vibrant campus community.

LEADERSHIP

- Currently serving as the Computer Engineering Lady Representative.
